

# Quick Reference Guide for PhoneMail Users

**PhoneMail Systems**  
Release 6.4

---

## How PhoneMail Helps You

The PhoneMail system helps you because it:

- Answers your telephone automatically and plays your personal greeting.
- Lets you call one number to access your messages if you are a mobile telephone user.
- Lets you listen to your most recently received message first.
- Lets you listen to all headers and messages played back in a continuous manner without prompts to save or delete each message.
- Accepts and stores voice messages in your PhoneMail mailbox.
- Lets you play back your messages at your convenience.
- Lets you send and receive messages anytime, from anywhere.
- Notifies you of new messages through pagers and telephones.

## Your Telephone Keypad

## Contents

This quick reference guide tells you:

- How to access PhoneMail, get help, and leave PhoneMail messages.
- How to use PhoneMail's most popular features.
- How to use PhoneMail's telecommunications device for the deaf (TDD) features.
- How to use the PhoneMail decision tree.
- Where to write your access numbers and personal distribution lists.

## Accessing Your Mailbox

### *Direct Access*

1. Dial the PhoneMail *direct access number*.
2. Press **#** if calling from your own extension, or  
if calling from another extension, dial your *extension number* (or your *name* if permitted), then press **#**.
3. Dial your *password*, then press **#**.

### *Greeting Access*

1. Dial your *telephone number* or *extension*.
2. During the greeting, press **5** to access your mailbox.
3. Dial your password, then press **#**.
4. Press **5** to listen to your messages in continuous playback order.
5. Press **\*7#3** to listen to your messages in the standard one at a time playback order.

### *Callback Access* (Available in PhoneMail Release 6.0 or later)

1. From your extension, press the *callback button* on your ROLMphone telephone (or your telephone's equivalent *repeat dial* or *speed dial* button).
2. Dial your *password*, then press **#**.

The first time you access the PhoneMail system, change your password. (Refer to “Changing PhoneMail Messages” on page 10.)

## Your PhoneMail Access Numbers

Your system administrator provides access numbers. Write yours here:

Direct access number \_\_\_\_\_

Greeting access number \_\_\_\_\_

Guest access number \_\_\_\_\_

	<i>Address the message</i> . (Refer to “Addressing” under “Decision Tree, PhoneMail Release 6.4” on page 8.)	

## Other Options and Features (continued)

### Using the Enhanced Multilingual Feature

The optional enhanced multilingual system permits callers to select one of two languages and TDD.

1. Press **[\*]** or **[0]** at any time to invoke the prompt:

“For instruction in <language>, press <number>.”

### Using the Voice-Activated Call Routing Feature

The voice-activated call routing feature is an optional speech recognition feature. There are no changes to prompts or the decision tree.

### Using the Decision Tree

Examine the decision trees on page 6 and page 8 to become familiar with the PhoneMail system’s option paths. When in doubt, follow the PhoneMail prompts.

### Documentation Feedback

To report a problem with this document, call your next level of support:

- Siemens employees should call the National Support Center.
- Customers should call the Siemens Customer Support Center.

When you call, be sure to include the following information. This will help identify which document you are having problems with.

- **Title:** Quick Reference Guide for PhoneMail Users, PhoneMail Systems, Release 6.4
- **Order Number:** G341-1729-01
